#OneStepCloser

You've got a marathon to run.
But your finish line is not 42 km.
Your finish line could be owning your own home.
Or managing your wealth for future generations.
It could be a business that builds fortunes.
Or an adventure that takes you around the world.
It's not easy, but it's not impossible either.
All it takes is one step at a time.

Brought to you by the bank that takes you
closer to where you want to be.

“SIRF EK HEE KYON?”

During pregnancy, most women receive Tetanus injections. But now, you and your baby can receive protection against 3 diseases: **Tetanus, Diphtheria and Pertussis.** All three together. While **Tetanus** is a nerve disease, **Diphtheria** is a serious throat infection that can block airways and **Pertussis** is a contagious respiratory disease, which can lead to hospitalisation in infants less than 2 months of age.

BLINK TO SPEAK

The world's first eye language by NeuroGen Brain & Spine Institute & Asha Ek Hope Foundation, to help paralysed patients with speech difficulty.

"For 2 years I couldn't say a word to my family. I was at their mercy, accepting whatever they gave me. I wish I had BLink to Speak then."

- John Julius, A quadriplegic patient, NeuroGen BS.

Now, eye language to beat speech difficulty.

PROBLEM

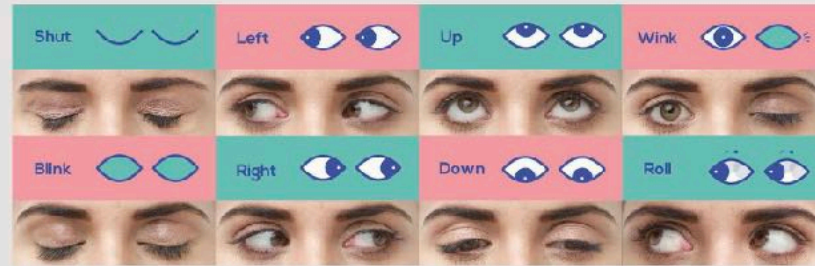

An estimated 60 million patients of ALS, MNDs, spinal cord injuries, and paralysis live all around the world with a paralysed body and an alert mind. They can't speak, write or use any sign language. Every day they struggle to communicate their needs and desires to their caregivers. The alternative methods of communication like, the E-TRAN board, are very tedious and the hi-tech assistive tools unaffordable. These patients and their families live for many years suffering, with no power to communicate.

SOLUTION

There is one body part that doesn't betray most patients till the very end. The eyes. So we created the world's first eye language. After months of research with patients, nurses and doctors we curated the most commonly needed messages by patients. Using the eye language even someone with a completely paralysed body can say anything. Just by using 50 simple eye movements.

EIGHT ALPHABETS OF BLINK TO SPEAK

Volunteer badges

Go to blinktospeak.com to download the guide for free and get tutorials.

World's 1st eye language guide made in India to help the paralysed interact without speech.
